1- THE GRAPH

Results on the factors (Score out of 10)

Results for the RIASEC dimensions

2 – PERSONALISED ANALYSIS

Interests that are specific to the profile

Below is a brief description of [REDACTED]'s main professional interests.

A few precautions in interpreting the results:

- Being a self-assessment, do not forget to address the salient features with the applicant or employee.
- We recommend to look at '**The Comments**' section of this report for a more personalised description of the profile.

Main professional interests

Interest in gaining knowledge, exploration of new concepts, preference for complexity, logic and reflection.

This factor assesses the interest in learning, studying and solving problems. People with a high score on this factor like to develop and to gain knowledge, do research, share what they know. In general these people avoid "leadership" jobs that require them to sell or be persuasive; instead they enjoy investigation and exploration.

Motivational skills, team leadership and persuasion.

This factor assesses people's interest in leading teams, motivating colleagues, managing conflicts, organising and making decisions. People with a high score on this factor like to improve group dynamics and to lead their team to the completion of projects.

Sharing of new ideas, imagination, intuition, innovation.

This factor refers to a desire to create, imagine, innovate, develop concepts, and make them real and concrete. People with a high score on this factor tend to avoid routine and conformity. Their minds are creative, and they are original and intuitive.

3 – THE COMMENTS

An interpretation of the score on each factor

Given below are the personalised comments for the 12 factors evaluated. These factors are derived from the 6 dimensions of the RIASEC model. For example, the dimensions of "Hands-on knowledge" and "Outdoors" fall under the "Realistic" dimension of the RIASEC model. Recognising the candidate's main interests should enable them to better understand their aspirations and professional potential.

However, it is possible that their current job does not give them the opportunity to take full advantage of these potentialities. Therefore, they should not hesitate to use this analysis to help them target activities (of leisure or other social activities) that will allow them to develop their full potential.

REALISTIC: Hands-on knowledge, Building, Physical activity, Outdoors

Score
3.9

0

10

Definition

"Realistic" type of individuals like physical and/or manual activities, to make concrete things and to experiment. Driven by concrete results, they are endowed with great dexterity and extreme patience for work that requires precision. Their physical endurance also makes them capable of doing any activity in the field. They also enjoy outdoor activities or jobs that are not confined to closed offices.

Personality: "Realistic" types tend to be tough, genuine, natural and practical. They love action.

Values: Common sense, pragmatism and effort.

Potential aptitudes: Dexterity, comfortable with technical tasks, mechanical intelligence and physical stamina.

Learning style: Learn through a concrete and practical approach by applying examples.

Environment: Realistic types are most comfortable in environments which allow them to obtain concrete results, to use technical equipment or to work onsite. They tend to dislike being confined to an office.

Physical and Outdoor Activities

Score
4.2

0

10

██████████ responses indicate a moderate interest in physical and outdoor activities. So given a choice, she would like to sit back and involve herself in activities which require physical effort only when really necessary.

Manual and Technical interests

Score
3.5

0

10

Shivangi Parney's responses indicate a low interest in manual and technical activities, specifically in professional settings. Therefore, she may be less inclined towards activities which require the involvement of her hands, tools or technical equipments.

INVESTIGATIVE: Research, Learning, Science, Technology

Score
7.9

0

10

Definition

This dimension corresponds to individuals that require theoretical knowledge in order to take action, who like to solve problems to make surveys and to research information in order to better understand their environment. "Investigative" type of individuals prioritise intellectual activities or scientific activities.

Personality: "Investigative" types tend to be curious about everything: they are constantly seeking to learn about and understand their environment. They are precise, intellectual and have a scientific mindset.

Values: Intellectual curiosity, critical thinking and logic.

Potential aptitudes: Research, logical reasoning, learning and analytical capabilities.

Learning style: Learn by theory and systematic research.

Environment: Investigative types are most comfortable in changing and thought-orientated environments that favor expertise over productivity.

Science and Technology

Score
6.9

0

10

Shivangi Parney's responses indicate a high interest in science and technology. Shivangi Parney prefers to be on the lookout for information about advances in science and technology. Therefore, she is likely to enjoy activities or tasks that allow her to involve herself in scientific exploration.

Intellectual Curiosity and Learning

Score
8.8

0

10

Shivangi Parney's responses indicate a strong inclination towards intellectual curiosity and learning. Shivangi Parney has a thirst for knowledge which pushes her to seek, investigate, uncover truths and explore. It is important for her to understand the meaning of things and the reason behind everything. Therefore, she would choose activities or a career which will allow her to put her intellectual abilities to use.

ARTISTIC: Feeling, Passion, Design, Creation

Score
5.4

0

10

Definition

“Artistic” type of people like to express themselves through artistic means (music, drawing, art, etc), but this dimension also refers to the need to express ideas and feelings. The related attitudes are therefore linked to creativity, imagination, sensitivity and the constant search for novelty. “Artistic” people need independence in order to express themselves and are not suited to conformity. They also like to create, conceive and prove to be creative.

Personality: “Artistic” types tend to be intuitive, creative, idealistic and independent. They are attuned to art and aesthetics.

Values: Beauty, originality, imagination and freedom.

Potential aptitudes: Creativity, artistic expression and intuition.

Learning style: Learn by intuition and experiment action.

Environment: Artistic types are comfortable in nonconformist environments that favor informal communication and require creativity and innovation.

Creativity and Design

Score
7.3

0

10

[REDACTED] responses indicate a high inclination towards creativity and design. [REDACTED] prefers environments that give him the freedom to develop new ideas and be innovative

Aesthetic Sense and Expression

Score
3.5

0

10

[REDACTED] responses indicate a low interest in aesthetic sense and expression. [REDACTED] may prefer working in occupations that do not require an artistic expression of thoughts and emotions.

SOCIAL: Conveying, Understanding others, Communicating, Relationships

Score
4.9

0

10

Definition

“Social” type of individuals like to take action in the presence of others, to help and communicate with others. The ability to meet new people is a key element of this dimension, which entails the ability to express themselves and a sense of cooperation or group work. “Social” people are attentive towards others, patient, understanding and good listeners. They will blossom in a harmonious setting filled with complicity, team work and contact with other people.

Personality: “Social” types are generally patient, understanding and attentive to others. They also tend to be kind, warm and welcoming.

Values: Altruism, cooperation and generosity.

Potential aptitudes: Empathy, listening and communication.

Learning style: Learn by sharing with others and by working as a team.

Environment: Social types are comfortable in social environments which encourage personal contact, collaboration and communication.

Dedication to others

Score
3.5

0

10

██████████ responses indicate a low interest in being of service to others. ██████████ may prefer working in environments that do not require her dedication to help others.

Personal relationships

Score
6.2

0

10

Shivangi Pandey's responses indicate a fairly high interest in occupations that require interactions with others. ██████████ maintains a good rapport with people that she has to work with and establish new relationships as she progresses in her work.

ENTERPRISING: Taking action, Undertaking projects, Leading, Managing

Score
6.8

Definition

This dimension refers to the need for openness, risk taking and to the desire to influence others and to persuade them by selling them ideas (or objects). The key elements of this dimension are initiative and communication, but also important are diplomacy and management. "Enterprising" type individuals are drawn to positions that require commercial aptitude, communications and initiative, such as that of lawyer, manager of a restaurant, or even trade farmer.

Personality: "Enterprising" types tend to be open, dynamic, assertive and entrepreneurial.

Values: Risk taking, status and competition.

Potential aptitudes: Initiative, ability to lead and motivate others.

Learning style: Learn by doing and by putting themselves in the action.

Environment: Enterprising types are comfortable in competitive environments where they can take risks and move up quickly.

Enterprising

Score
5

██████████ responses indicate that she has a fairly high interest for enterprising. ██████████ may like developing on her ideas and initiating new processes. ██████████ thrive in occupations that allow her to handle risks and be resourceful.

Leadership

Score
8.5

██████████ responses indicate the she has a strong inclination towards leadership roles. ██████████ may prefer occupations that allow her to lead a team by encouraging and motivating them. ██████████ enjoys organising projects and resolving conflicts. ██████████ prefers making decisions for the team, delegating tasks and give the necessary direction to them.

CONVENTIONAL: Planning, Structuring, Processing data, Figures

Score
2.4

Definition

The term “conventional” relates to a preoccupation with orderly and meticulous work and the adherence to the rules and planned activities. “Conventional” type of people like to conform to precise rules, to be organised, efficient and respectful towards authority. They are very comfortable with jobs that require accounting and management and they enjoy routine tasks. If they hold an executive position, they will be best at supervising others and ensuring that the rules are being followed rather than start new projects or manage emergencies.

Personality: “Conventional” types tend to be meticulous, perfectionist, conformist and rather introverted.

Values: Accuracy, stability and efficiency.

Potential aptitudes: Data analysis, attention to detail and ability to work with numbers.

Learning style: Learn by following the rules, instructions and established procedures.

Environment: Conventional types feel at home in structured and hierarchical environments where rules and procedures are clearly defined.

Interest in Data and Numbers

Score
3.5

[REDACTED] responses indicate that she has a low interest in data and numbers. [REDACTED] may prefer to work in occupations that do not include working with numbers and abstract data.

Methodical

Score
1.2

[REDACTED] responses indicate a very low inclination towards organisation and structure. [REDACTED] prefers being free from rules and regulations. [REDACTED] may thrive in occupations that do not require meticulous organisation of her tasks and high attention to detail.

4 - GENERAL PROFILE

Analysis of the suitability of the profile in relation to RIASEC combinations

Given below are 15 possible combined profiles from Holland's model (e.g Social/Conventional or Investigator/Artist, etc.) that suit the candidate best, with examples of occupations or related sectors.

A perfect match corresponds to 100%.

Click on '**Details**' (only in HTML version of the report) to view the candidate's graph superimposed on the ideal graph for that particular dimension.

COMBINED PROFILES FROM HOLLAND TYPOLOGY

1	IE (EI) (Investigative / Enterprising)		79%
2	IA (AI) (Investigative / Artistic)		72%
3	IS (SI) (Investigative / Social)		69%
4	AE (EA) (Artistic / Enterprising)		65%
5	RI (IR) (Realistic / Investigative)		63%
6	SE (ES) (Social / Enterprising)		62%
7	RE (ER) (Realistic / Enterprising)		57%
8	AS (SA) (Artistic / Social)		55%
9	IC (CI) (Investigative / Conventional)		54%
10	RA (AR) (Realistic / Artistic)		49%
11	EC (CE) (Enterprising / Conventional)		48%
12	RS (SR) (Realistic / Social)		46%
13	AC (CA) (Artistic / Conventional)		40%
14	SC (CS) (Social / Conventional)		37%
15	RC (CR) (Realistic / Conventional)		32%

IE (EI) (Investigative / Enterprising) 79%

It appears that you have an inclination towards investigative activities that require analysis and constantly learning new things. Pairing this with your interest in activities that involve enterprising aspects such as risk-taking, persuasion and influencing others, your profile suggests that you will enjoy working in complex and challenging environments.

Appropriate trades include:

- Legal fields: lawyer, solicitor.
- Management in fields of high complexity, such as engineering and mathematical fields.
- Journalism and reporting.
- Sales: sales engineers, business engineers, technical sales representatives, buyers, etc.
- Management of research projects.

IA (AI) (Investigative / Artistic) 72%

Your profile shows that you would thrive in an environment that welcomes your imagination, and where you are able to investigate and work on complex projects, involving in-depth analysis of theory. Your curiosity and inclination towards reflection will allow you to flourish in creative industries where a level of examination and problem-solving is required.

Appropriate trades include:

- Research into creative or artistic fields.
- Journalism, editorial functions.
- Marketing, communications and advertising fields.

IS (SI) (Investigative / Social) 69%

You appear to like investigative work, where you are able to solve problems and analyse theoretical information, while also interacting with or helping other people. As a result, you may be well-suited to a career where you are able to examine complex or scientific topics, and work towards improving the well-being of others.

Appropriate trades include:

- Therapist, psychiatrist, psychologist, nutritionist.
- Medical and paramedical fields: generalist or specialist, pharmacist.
- Research in human sciences: archaeologist, anthropologist, historian, sociologist, etc.
- University lecturer, career guidance, counsellor, education advisor, etc.

AE (EA) (Artistic / Enterprising) 65%

It appears that you have an interest in artistic activities; specifically, those that enable you to express yourself through conceiving and designing ideas. Your preference for activities that allow you to be enterprising also means that it is likely that you would enjoy developing your artistic interests within an environment that allows you to take risks, lead, and take initiatives. This would give you a sense of freedom in your work, and the chance to push yourself.

Appropriate trades include:

- Artistic and editorial functions: art director, art dealer, head designer.
- Marketing and advertisement: marketing/advertising manager, product manager, press relations, freelance copywriter, etc.
- Management or creation of innovative business.

RI (IR) (Realistic / Investigative) 63%

With an interest in solving complex problems and furthering your knowledge, you are likely to enjoy projects that allow you to investigate and use your intellectual curiosity. However, you also appear to have a preference for practical work that will bring you tangible results, involving manual or outdoor activities. A career that involves being physically active and practical as well as investigating and researching scientific theories, should allow you to reach your potential.

Appropriate trades include:

- Archaeology.
- Industrial/electrical/agronomic engineering,
- Technical and maintenance support.
- Geologist/geographer.

SE (ES) (Social / Enterprising) 62%

With an interest in social interaction and a strong entrepreneurial spirit, your ideal career appears to be one that will allow you to push yourself, lead others and communicate with or help people on a day-to-day basis. A profession that allows you to work in a dynamic and business-oriented, yet sociable setting, would suit your preferences well.

Appropriate trades include:

- Sales, business development, etc.
- Management in people related fields such as human resources,
- Politics and business.

RE (ER) (Realistic / Enterprising) 57%

Due to your interest in tasks that bring you concrete results, you are likely to enjoy outdoor and/or manual projects. Together with your interest towards management and initiative taking, you may be well-suited to professions that allow you to have responsibility, push yourself, be active, and work with equipment or machines.

Appropriate trades include:

- Management roles in the construction industry or agriculture-related fields, etc.
- Chief police officer/high ranking military officer, firefighter.
- Management in or start-up within heritage, outdoor projects, and gardening fields.

AS (SA) (Artistic / Social) 55%

Your profile reveals a combination of artistic and social interests. Interested in helping and being with others, your ideal career is likely to be one that involves some sort of social interaction and an element of creativity. Professions that give you the freedom to create or put your intuitive ideas into action, with an aspect of everyday face-to-face communication would match your profile.

Appropriate trades include:

- Art/music therapist.
- Training and education fields: teacher, private tutor, etc.
- Hair stylist, beautician, make-up artist, etc.

IC (CI) (Investigative / Conventional) 54%

You appear to have an inclination towards investigating different topics and acquiring knowledge, combined with an interest in handling figures and applying logical reasoning. You are likely to prefer working on projects that require organisation and structure, and where you are able to put your mind to work and solve problems or examine theories.

Appropriate trades include:

- Economics, financial and mathematical research fields: statistician, economist, marketing research analyst, etc.
- Engineering within the electrical, civil and environmental fields, etc.
- Research and development: research technician, research engineer, research assistant, etc.
- Financial trades: analyst, controller, auditor, etc.

RA (AR) (Realistic / Artistic) 49%

It appears that you have an interest in activities that take place outdoors, or that involve a physical aspect, and/or produce tangible results. It also appears that you would enjoy a profession that involves creativity. A career where you could express your ideas in an artistic form, or conceive and design concrete ideas may be well-suited to you.

Appropriate trades include:

- Craftsmanship, prop/set making, costume designing, interior decorator, illustrator, sculptor, etc.
- Arts/entertainment technician, industrial designer, etc.
- Horticulturist, landscape architect, gardener, etc.
- Photographer, chef.

EC (CE) (Enterprising / Conventional) 48%

With an interest in activities that are both enterprising and methodically structured, you are likely to be well-suited to a role that requires a combination of dynamism and organisation within a business-focused environment. Such a profession will allow you to lead others and push the business forward, while ensuring that a high level of quality and responsibility is kept at all times.

Appropriate trades include:

- Areas of financial management within areas such as sales administration, quality control, and analysis, etc.
- Project management/coordination.
- Company management and administration roles, such as director, assistant director, executive assistant
- Store/boutique manager, hotel manager, etc.

RS (SR) (Realistic / Social) 46%

You appear to have a preference for activities that involve interacting with and helping others, as well as for practical tasks that may involve physical activity or manual work. As a result, you are likely to be well-suited to professions that require you to help or communicate with those around you, and work on concrete projects that give you tangible results.

Appropriate trades include:

- Education in outdoor settings: agriculture, physical education.
- Sports coach.
- Tourism industry: travel/tour guide, etc.
- Hospitality industry: waiter, bartender, etc.

AC (CA) (Artistic / Conventional) 40%

You appear to have a creative flare and a strong desire to work in a structured and organised manner. Your imagination combined with your attention to detail suggests that you will enjoy areas that involve both accuracy and creativity. Fields such as craftsmanship may provide the ideal working requirements for you.

Appropriate trades include:

- Craftsmanship: restorer, glass-worker, engraver, etc.
- Graphic design, IT Development, desktop publishing, etc.
- Audiovisual trades: sound engineer, visual engineer, cameraman, etc.

SC (CS) (Social / Conventional) 37%

You like to have an aspect of structure in the tasks that you undertake; methodical procedures and/or data and numbers are your expertise. Along with this, you appear to have a strong desire to work with people, whether it be communicating with or helping others on a day-to-day basis. A well-structured environment that allows you to combine social interaction with your keen eye for detail would suit you well.

Appropriate trades include:

- Social sectors: social worker, social services, etc.
- Counselling: family counsellor, vocational counsellor, etc.
- Education: teacher, etc.
- Client support and account management: sales executive, customer services, consulting, etc.

RC (CR) (Realistic / Conventional) 32%

You appear to have an interest in physical or manual activities that produce concrete results, or take place outdoors. Pairing this with your interest towards activities that are methodical, or that involve working with data and numbers, it is likely that you would enjoy an occupation that allows you to handle equipment or tools that require high attention to detail, in an organised and structured environment.

Appropriate trades include:

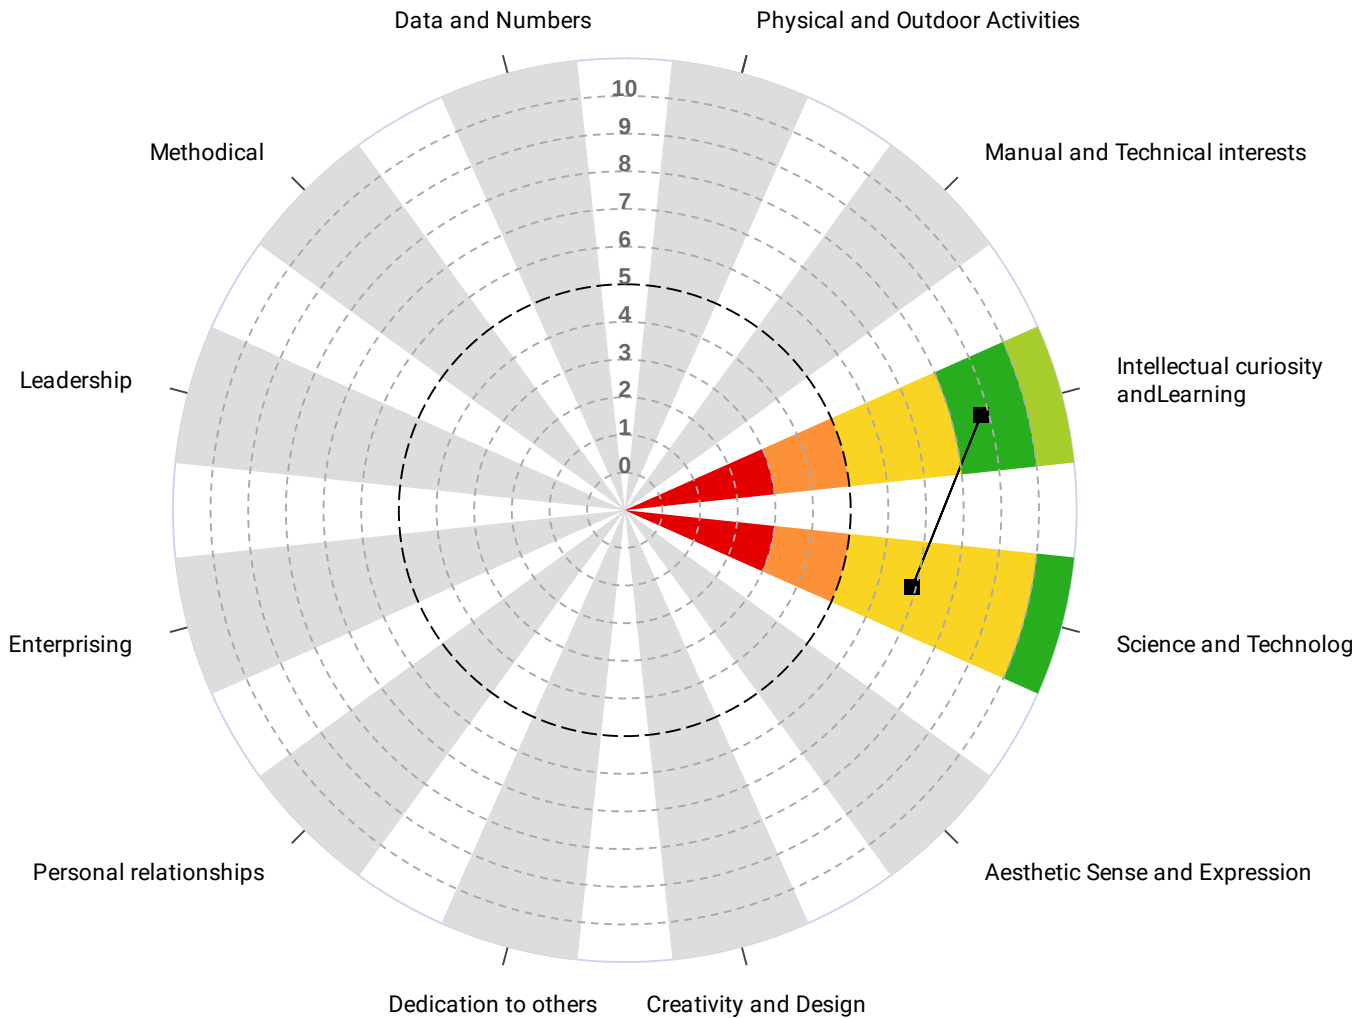

- Construction, fieldwork, etc.
- IT or industrial sectors: maintenance or network engineer, etc.
- Security sector: security guard, police officer, military officer, etc.
- Agricultural trades: farmer, winemaker, etc.
